- You can also use the "Shape" tool to add other shapes.
- Click "Insert" then "Shape" then choose the shape you want.
- Drag to create the shape.
- Rotate and resize as needed.
- Color with "Fill color" tool.

Optional...

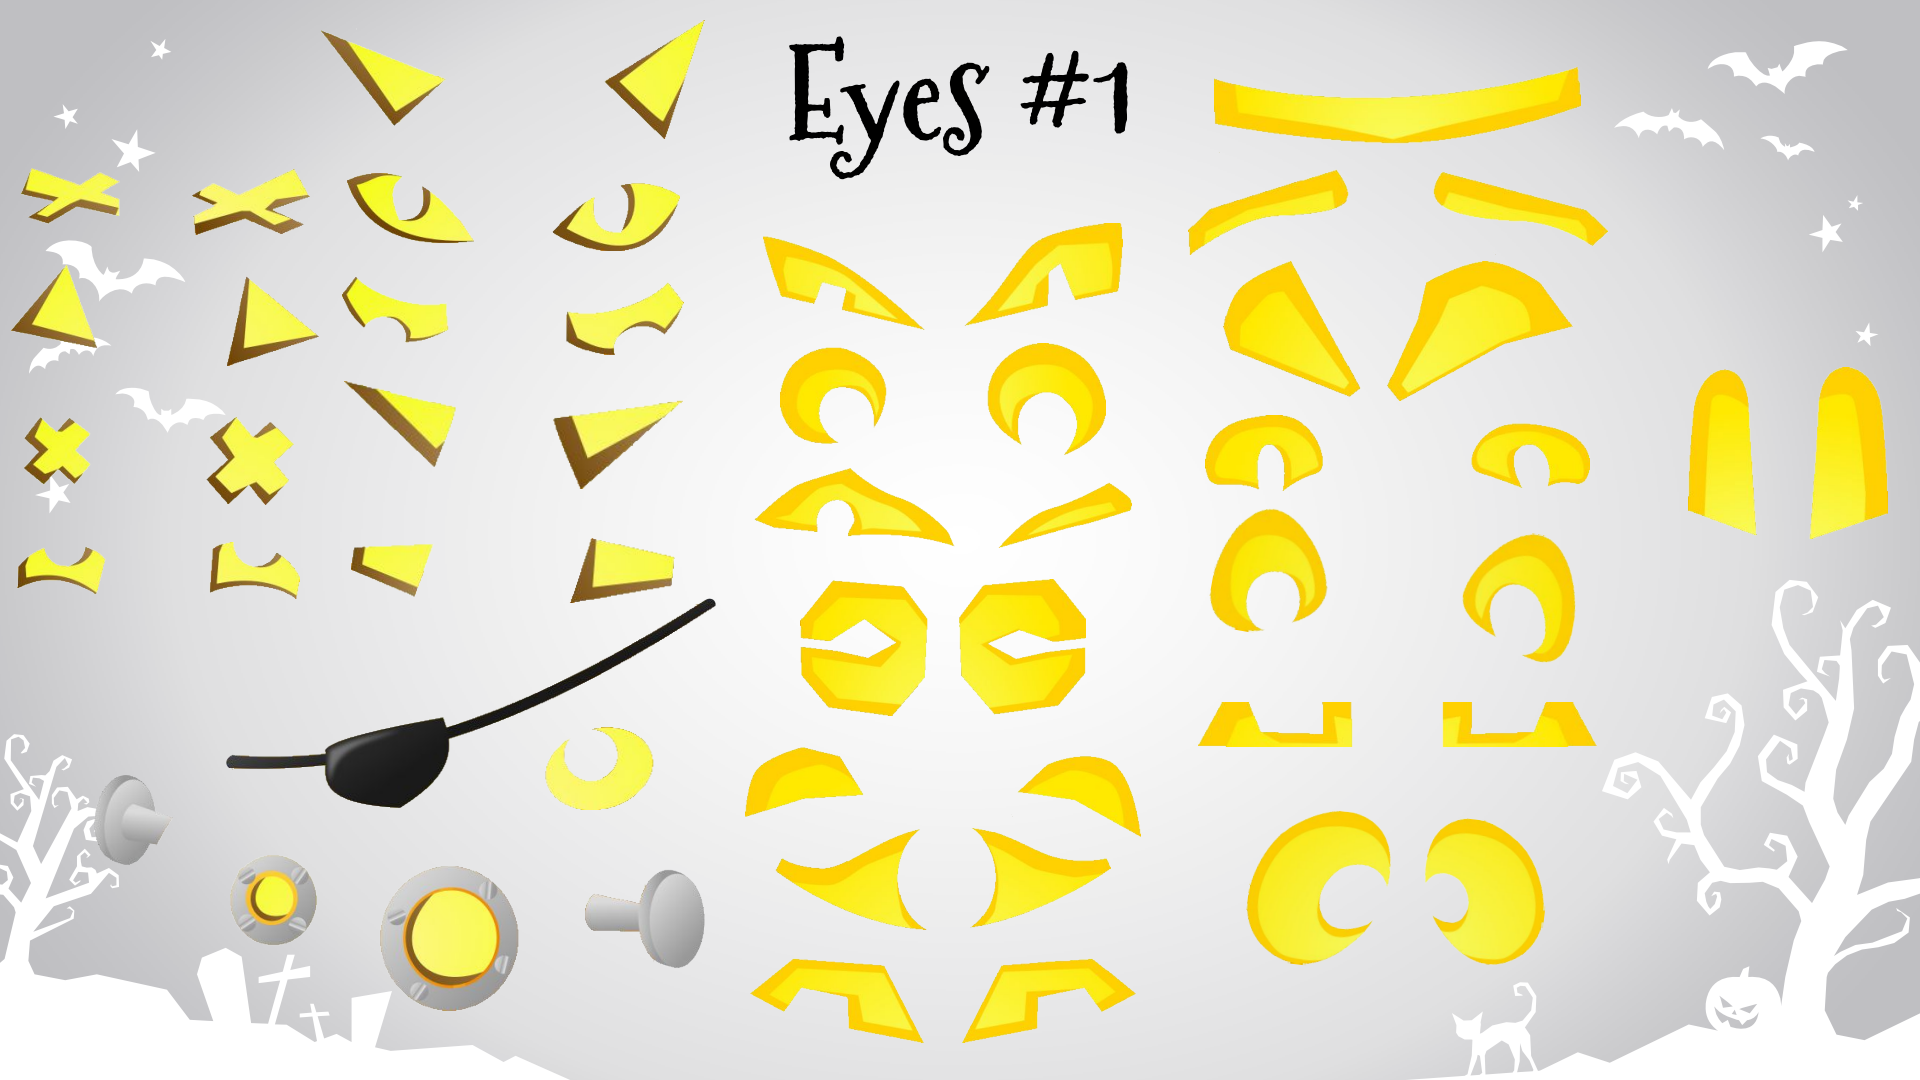

- You can also use the "Polyline" tool to make custom shapes.
- Click "Insert" then "Line" then "Polyline".
- Click endpoints to create the shape.
- Color with "Fill color" tool.

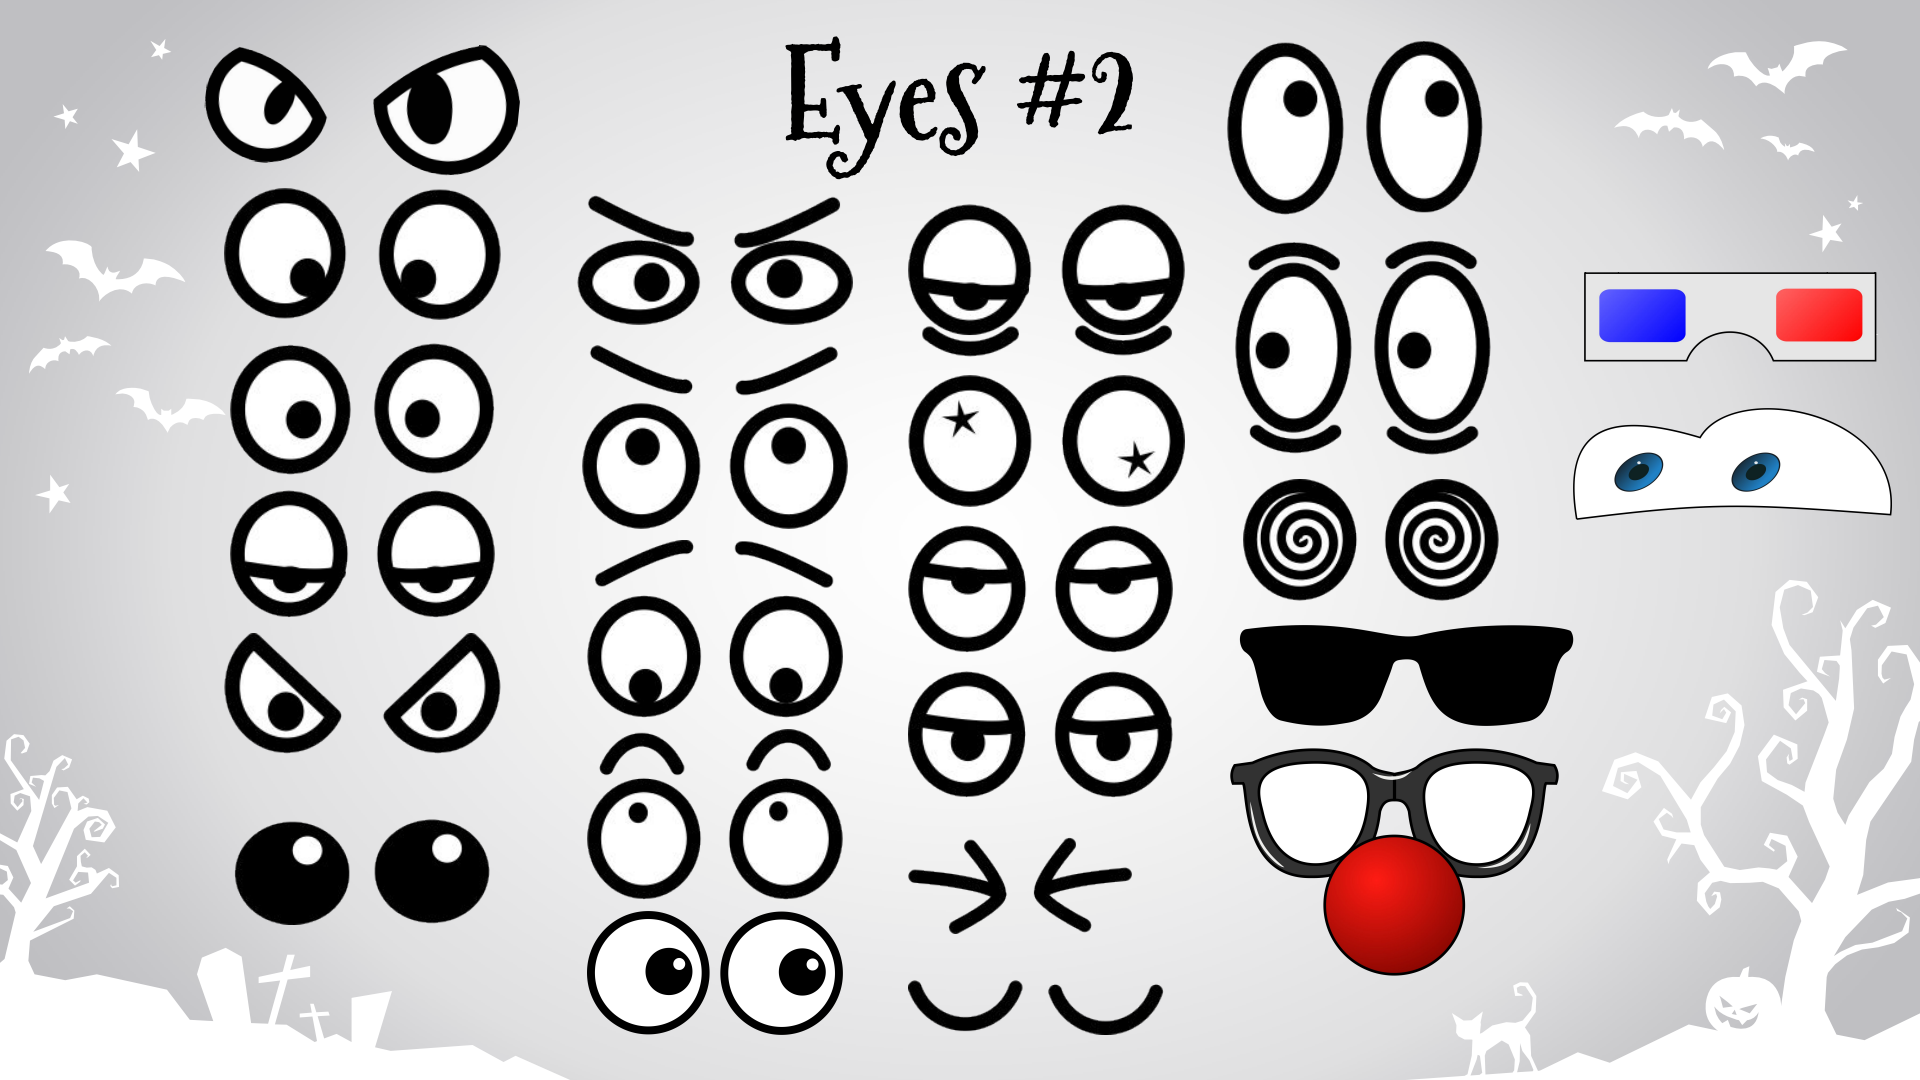

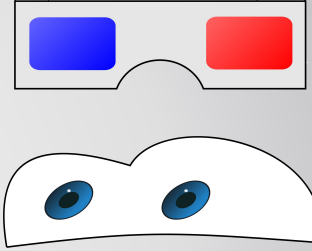

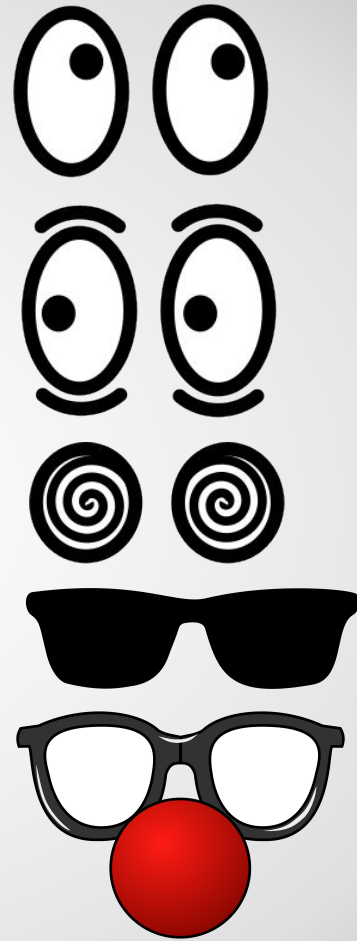

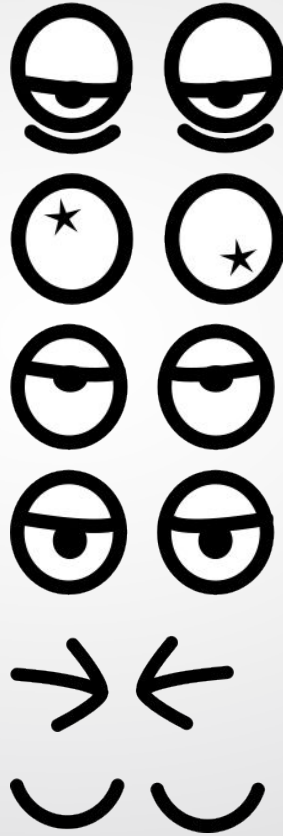

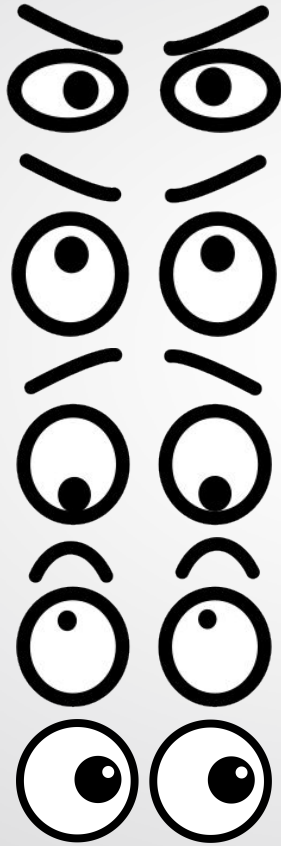

One stormy night a curse came upon the land of pumpkins. It hit a pumpkin, and it came to life! It had mad eye's, lizard feet, a big mouth, bone arms and a pilgrim hat. It was angry its name was Mad the mbba. Mad wanted revenge. He made a machine called the S.D.C.T.L.R. or for long, Super Dynamic Come To Life Replicator. He brought the other pumpkins to life. They had wands, brooms and scary faces on them. Only one person could stop them. His name was Zack. He got a knife and carved them with cool smiles. Zack won and everyone thanked him. The End!
